DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as anticipated by Cafolla et al.

(Oracle Human Resources, North American User's Guide, Release 11, Volume 1, March 1998, hereafter "Cafolla");

As per independent claims 1, 8 and 14, Cafolla teaches the following:

"selecting one or more employees to exclude from a first view, the first view including employee profile information corresponding to a plurality of employees" at Page 13-2, lines 8-10 by using people folder as the first view to find people of interest and then using inquiry window as the second view to show specific information about person(s) (Page 13-2, lines 11-12);

"excluding the employee profile information corresponding to the selected information from the first view, the exclusion resulting in a second view" at Page 13-3, "Note:", by customizing People Folder window to include "Display check box" as one displaying column (Page 8-8, lines 8-10) for the first view, and then drill down of the view and check the box(es) for person(s) to be excluded; and "granting view access to the second view to one or more of the selected employees" at Page 34-15, Paragraph "ROLEGEN" by creating and executing SQL command scripts for

creating role and then granting or revoking permissions for viewing line items to or from selected employee(s).

As per claims 2, 9 and 15, Cafolla teaches "displaying the employee profile information in the second view on one or more display devices" and "wherein at least one of the display devices corresponds to one of the selected employees" at Page 13-2, lines 8-10 by using people folder as the first view to find people of interest and then using inquiry window as the second view to show specific information about a person (Page 13-2, lines 11-12) who him/herself is running the HRMS application;

As per claims 3, 10 and 16, Cafolla teaches "simultaneously displaying employee profile information pertaining to the second view to a plurality of collaborating employees, wherein the collaborating employees include at least one of the selected employees" at Page 14-36 by showing the assignment history window, as the first view, for all of an employee's assignments while the assignment folder window being utilized as the first view (Page 30-3, lines 14-16);

"receiving an employee profile change request to revise the employee profile data corresponding to one of the employees, the received request being from one of the collaborating employees" at Page 14-4 (last paragraph) and Page 14-9;

"modifying the employee profile data according to the request" at Page 14-4 (last paragraph) ; and

"displaying the modified employee profile data to the plurality of collaborating employees" at at Page 14-36 by showing the assignment history window, as the first view, for all of an

employee's assignments while the assignment folder window being utilized as the first view (Page 30-3, lines 14-16).

As per Claims 4, 11 and 17, Cafolla teaches "the first view corresponds to a manager and wherein each of the excluded employee profiles corresponds to an employee that reports to the manager" at Pages A-31 by navigating the "Organization" menu for reaching an organization in the hierarchy, and Page 2-38, Paragraph "To create a new version of an existing hierarchy" by having subordinates block modified for including the employees with profiles excluded corresponding to the employee reports to the organization manager.

As per Claims 5, 12 and 18, Cafolla teaches "storing second view data corresponding to the second view on a nonvolatile storage area, the second view data including a grant list of employees that were granted access to the second view and an exclusion list of employee profiles that were excluded from the second view" at Page 34-2 by controlling user's access through records and organization information types and, then storing the information by using Oracle Application Data Export to export and save the data in the view to storage (Page 30-2).

As per claims 6, 13 and 19, Cafolla teaches "receiving a view request from a requesting employee" at Page 14-28 by listing people by assignment;
"retrieving the second view data" at Page 14-36 by listing an assignment history of person(s) selected from the first view;
"comparing the requesting employee with the grant list of employees" at Page 34-2 by controlling user's access through records and organization information types; and

"determining whether to allow the requesting employee access to the second view in response to the comparison" Page 14-29 by restricting a further review of the list.

As per claims 7 and 20, Cafolla teaches "displaying a list of reporting employees to a manager" at Page 14-29 by displaying the assignment list; and
"wherein the selecting includes receiving one or more exclusion selections from the manager in response to the displayed list" at Page 14-29, lines 11-12 (excluding counting lines in the table) by further restricting the list of the employees to be displayed.
